Introduction : What & Who

Nepal Travel: Discover Hidden Natural Retreats

Nepal Travel is a platform designed to help users discover hidden natural places across Nepal. It focuses on lesser-known destinations such as forests, hills, lakes, and peaceful viewpoints. The platform allows travelers and locals to explore, share, and review travel experiences. Users can access useful information like routes, seasons, photos, and travel tips. The system aims to promote local tourism and make trip planning easier and more reliable.

- Hidden places dispersed across social media and word-of-mouth — hard to discover.
- Travel decisions are difficult without reliable, consolidated info.
- Local gems lack exposure and preservation incentives.
- Visitors need trustworthy, practical details (routes, seasonality, highlights).

- International platforms like [Tripadvisor](#) mainly focus on famous tourist destinations and commercial attractions, not hidden natural places in Nepal.
- Nepali trekking sites such as [Welcome Nepal Treks](#) and [Nepal Hiking Team](#) mainly promote popular trekking packages like Everest and Annapurna.
- [Nepal Tourism Board](#) provides official tourism information but gives less focus to lesser-known local destinations.
- Social media platforms like Instagram and TikTok contain scattered travel information without proper guidance or organized details.
- Our platform focuses on hidden natural places in Nepal by combining maps, local reviews, travel tips, and community sharing in one system.

Find hidden places

Build a growing list of nature getaways across Nepal with useful details.

Simple search and filters

Search by activity, difficulty, season, trip length, and region.

Community sharing

Let locals and travelers add places, reviews, and photos.

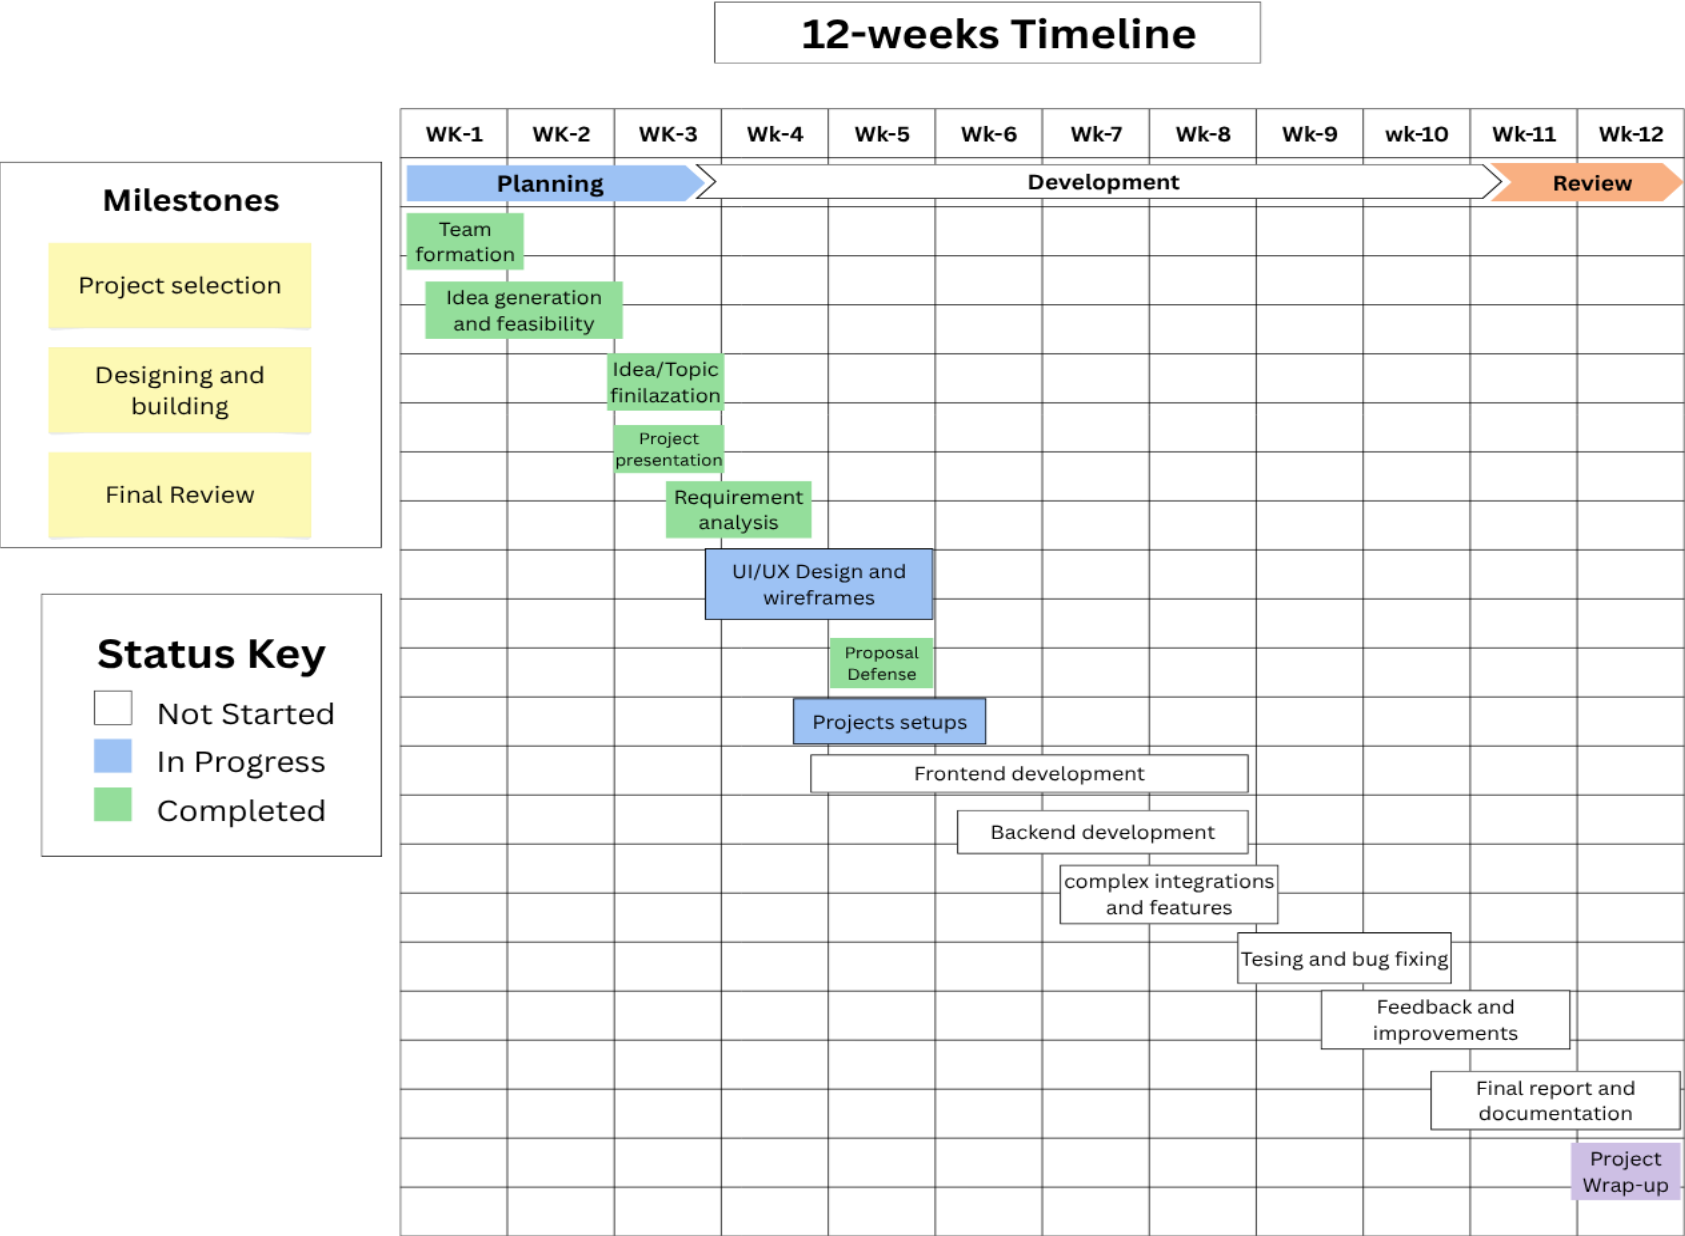

Plan trips easily

Save places to collections, add notes, and Organize future trips.

- **Requirement Analysis** : Identify user needs like finding hidden places, viewing details, and saving locations.
- **System Design** : Create UI wireframes and design the database structure.
- **Frontend Development** : Build interface using HTML, CSS, and JavaScript.
- **Backend Development** : Develop server-side logic using PHP.
- **Database Creation** : Store user data and place information using MySQL.
- **Map Integration** : Use Google Maps for location display.
- **Testing** : Check for errors, bugs, and proper functionality.
- **Feedback & Improvement** : Collect feedback and enhance the system.

- **Technical**
Can be built using PHP and MySQL for backend. Simple frontend with HTML, CSS, and JavaScript.
- **Schedule (Time)**
Can be developed within a student project timeline
- **Data**
Data will be collected from community user contributions, collaborations with local guides, and leveraging open-source map data to ensure a rich and diverse database of locations.
- **Operational Feasibility**
Easy for users to upload and explore places
Simple UI/UX for beginners
- **Social Feasibility**
Encourages tourism and local exploration in Nepal
Helps promote hidden/local places

How we compare

Focus on Hidden Gems

Unlike mainstream travel platforms, we prioritize lesser-known natural spots instead of overcrowded tourist destinations.

Community-Driven Content

Users can share real experiences, photos, and tips—making the platform more authentic and constantly updated.

Local-Level Details

Provides practical info like routes, transportation options, entry fees, best time to visit, and safety tips specific to Nepal.

Personalized Collections

Users can save and organize places into custom lists (e.g., “Weekend Chill Spots”, “Solo Trips”, “Near Kathmandu”)

Conclusion

Nepal Travel is more than a trip-planning platform — it is a way to discover hidden gems, share trusted local knowledge, and make every journey more meaningful.

- Helps travelers uncover authentic places beyond the usual tourist paths
- Empowers local communities by giving them visibility and a stronger voice
- Makes trip planning easier with trusted details, routes, and seasonal tips

With Nepal Travel, exploration becomes more connected, more personal, and more impactful.

Thank you...
